EUROPEAN FOOTWEAR GIANT ARRIVES IN UK

Technical walking boots by a European leader have arrived in the UK.

Crispi was born in 1975 and is prolific in the specialist skiing, mountaineering, military and hunting markets. Every single boot is the result of experience; from the most difficult climbing situations in Tibet, to the longest walks around the world, to the special use of the anti-terrorism corps.

The sturdiness of Crispi boots surely will not go unnoticed by those who tread on the most testing grounds. The brambles and rocky slopes of fieldsports situations will destroy the sole and upper of conventional walking boots at an amazing speed, but not Crispi whose Country range is now market leader in Italy, and ranks amongst the top in many countries thanks to steadfast top quality standards.

Two advanced developments will set apart Crispi walking boots from others in the country sector; the ABSS ankle support system and the durable lining in conjunction with Gore-Tex.

In designing its footwear, Crispi pays almost fanatical attention to the dynamics of the feet during walking. It was precisely by studying foot movement that Crispi developed a new inner lining which is stronger and resistant to wear in the common toe area. They combined the two Gore-Tex® linings, extremely tough Duratherm Ultimate with the natural comfort of Skin Tech membrane bonded to the leather, with a hard-wearing and long-lasting result.

Many years of research and trials have also been dedicated to comfort and protection, wherein Crispi has conquered a huge step forward in the global footwear industry. Their new system developed is called A.B.S.S. (Ankle Bone Support System), which revolutionises the comfort and protection of the entire ankle area thanks to a combination of innovative materials which allow the footwear to contour gently around your ankle. This system offers outstanding sprain protection even on the roughest terrain whilst supporting the ankle in all conditions, thereby thus limiting fatigue on the lower joints even after very long walks.

The Crispi Stegg is a calf-height boot in full grain leather with the durable combination Gore-Tex lining, a Vibram sole, and full protective rubber rand. The Stegg comes in sizes: 39 - 47, priced at £234.95 SRP from gunshops and country clothing outlets nationwide. For more information on Crispi footwear and details of your local stockist, please call Garlands on 01827 383300 or email info@garlands.uk.com.
